

PAYware Mobile - Simple. Secure. Savings.

If you need a solution that does not break the bank, is convenient, flexible and keeps pace with your business, then PAYware Mobile is the solution for you.

SIMPLE

- Works on existing 3G/3GS and 4 iPhones™
 - PAYware Mobile Card Encryption Sleeve Generation 1.0 – iPhone 3G/3GS
 - PAYware Mobile Card Encryption Sleeve Generation 1.5 – iPhone 4, 3G/3GS
- No charging required for the encrypting card reader
- Free application download from the Apple App Store
- No printer needed – just e-mail the receipt
- Captures signatures via an included stylus

SECURE

- Complies with global software security standards
- Transaction is fully encrypted at the card reader – not just when it is sent
- Application can be password protected for added security
- Remote deactivation of the payment account available

SAVINGS

- Swiped transactions save up to 30 percent in fees versus keyed transactions

- Economical encrypting card reader is the only hardware cost**
- Decrease risk of cash theft and bad checks with card acceptance

PAYware Mobile is the complete payment solution that transforms the iPhone into a secure payment device. Download the application to your iPhone, slide the iPhone into the encrypting card reader and you are ready to take card payments!*

Accept payments on the go at a fraction of the cost of standard wireless terminals.

With PAYware Mobile, you will never miss a sale.
